

## Dojo Website Activity 1 Instructions

1. Add the line `<h2>Course List</h2>` after line 32 (after the `</div>` tag in the `<body></body>` section).

Note: You can add this css anywhere inside the `<style></style>` tags to center the text

```
2. h2 {text-align: center;}
```

3. Add and commit the changes
4. Search for any existing branches
5. You should find one branch, check it out and confirm the changes in the code
6. Switch back to the master branch
7. Merge the branch and resolve any conflicts

## Dojo Website Activity 2 Instructions

1. Have one person from your team fork this repository  
[https://github.com/softhank/dojo\\_website.git](https://github.com/softhank/dojo_website.git)
2. Add the other members as collaborators
3. Each member should
  - a. Clone the repository
  - b. Make your **OWN branch**
  - c. Add one course info section
  - d. Push their changes (push your **own branch** only!)
  - e. Create a pull request and assign a reviewer (make sure all members get assigned as a reviewer)
  - f. Review a team member's PR and merge the changes
  - g. Resolve any conflicts

**note:** when merging the PR, merge to the **forked repository**, **not** Lewis original repository

Courses to add

1. Github
2. AWS
3. Python
4. Docker

Use the following format to add the course info section for your course

```
<div class="course-info">
  <h3>How to Use AWS</h3>
  <p>This is a course on how to use Git</p>
  
</div>
```
